

**Benna Red Dragon**

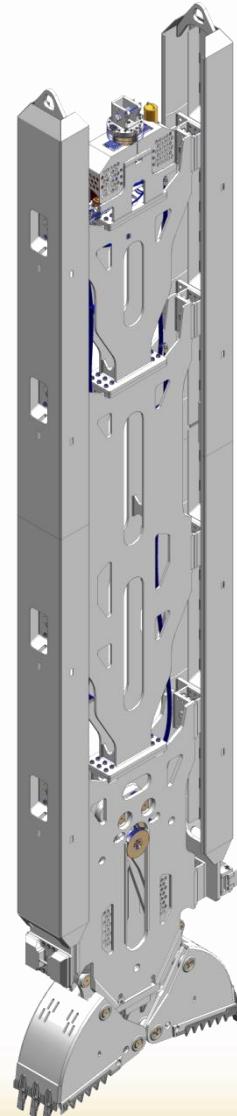

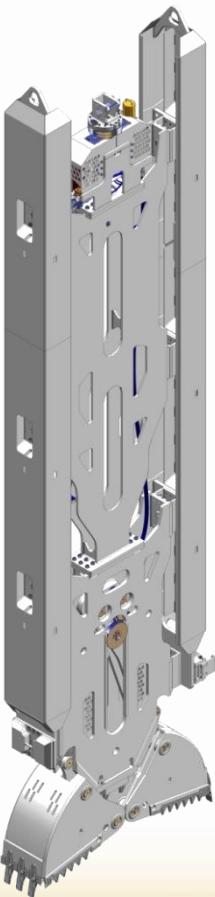

All accessories are interchangeable between hydraulic and mechanical grab, an economic advantage, because you can use the excavation kit both on the hydraulic and on the mechanical grab

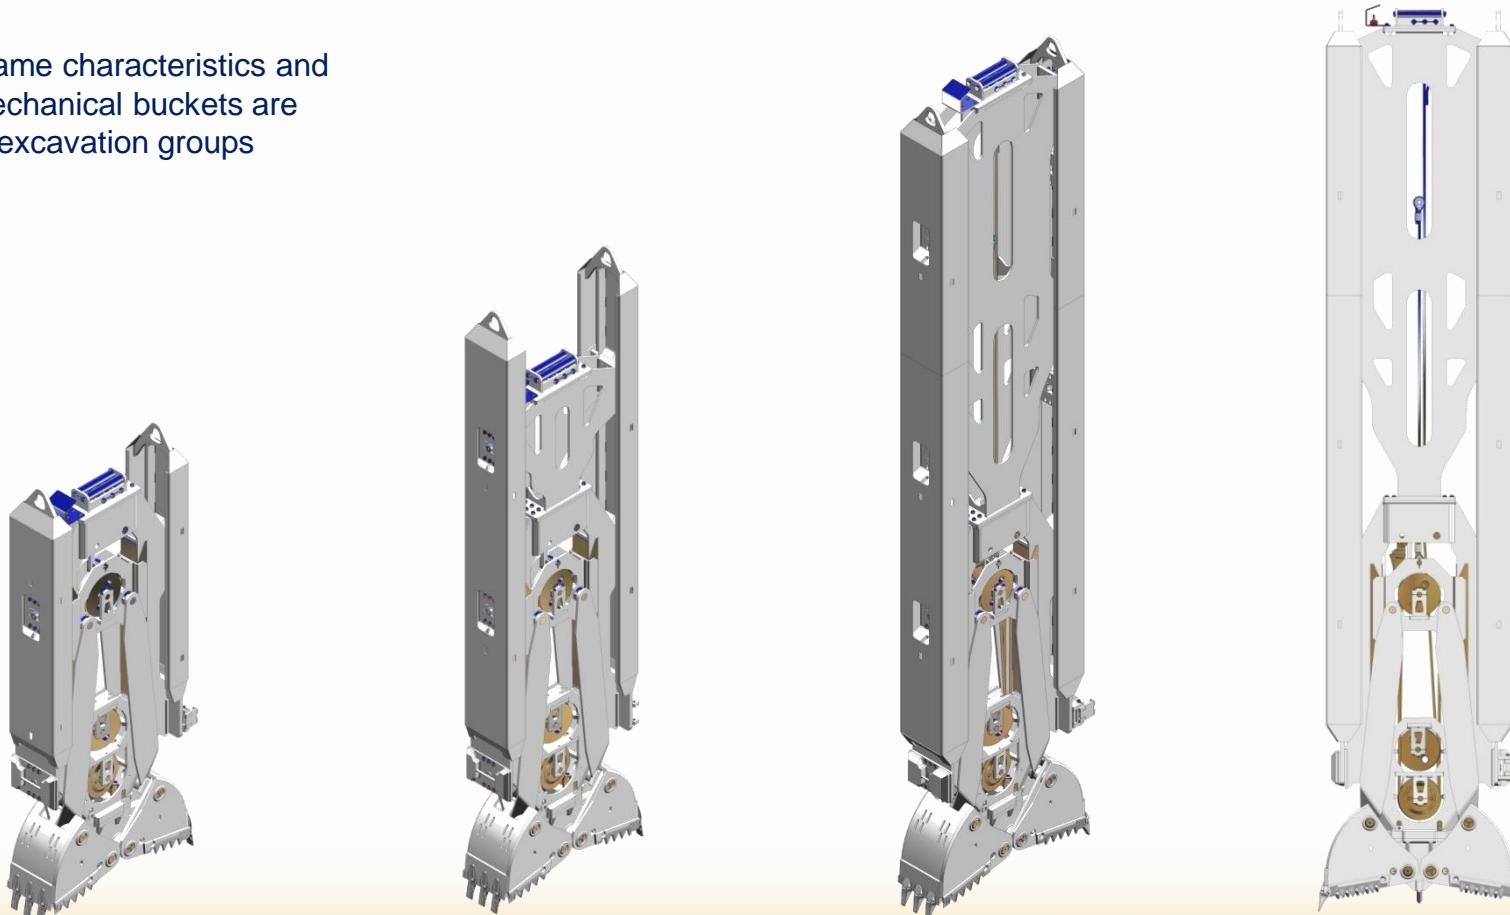

## Dragon White grab (hydraulic)

All the Dragon family have same characteristics and accessories, hydraulic and mechanical buckets are interchangeable with similar excavation groups

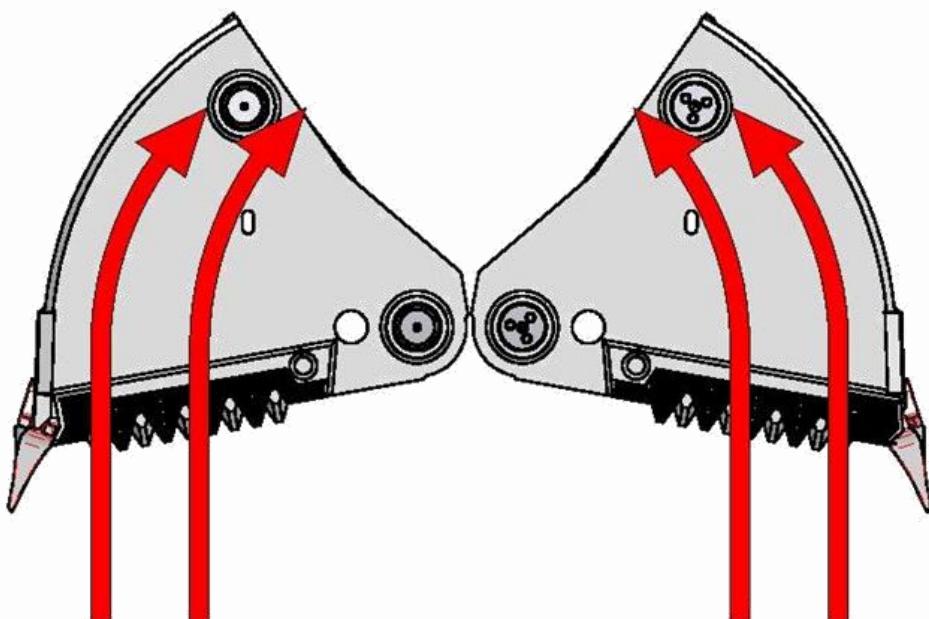

## Red Dragon grab (mechanical)

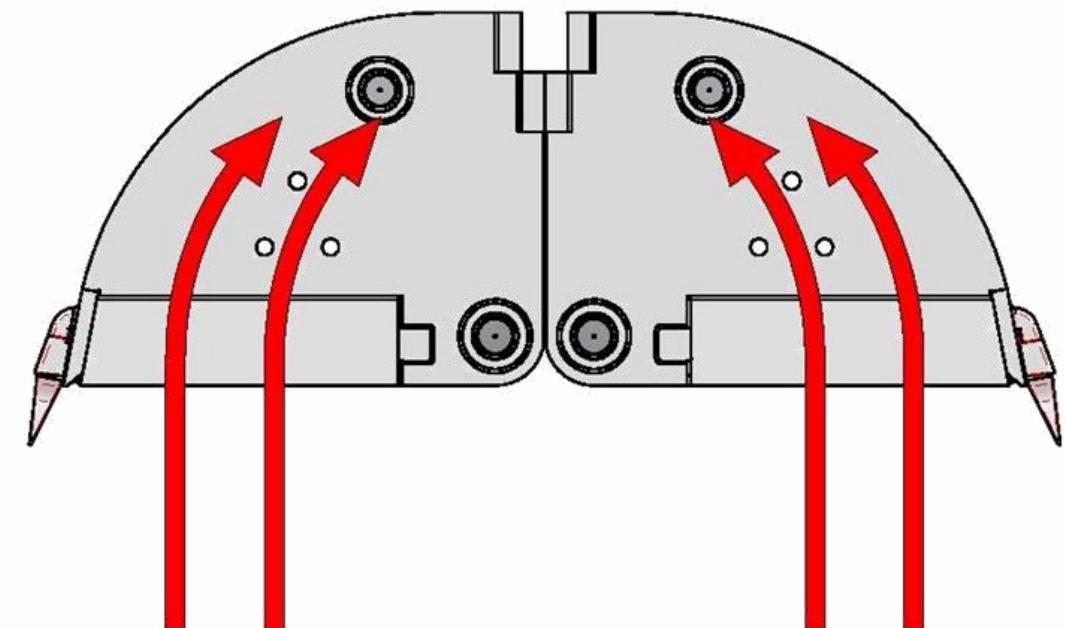

All the Dragon family have same characteristics and accessories, hydraulic and mechanical buckets are interchangeable with similar excavation groups

Improving mud drainage through big passages in valve

Dragon valve

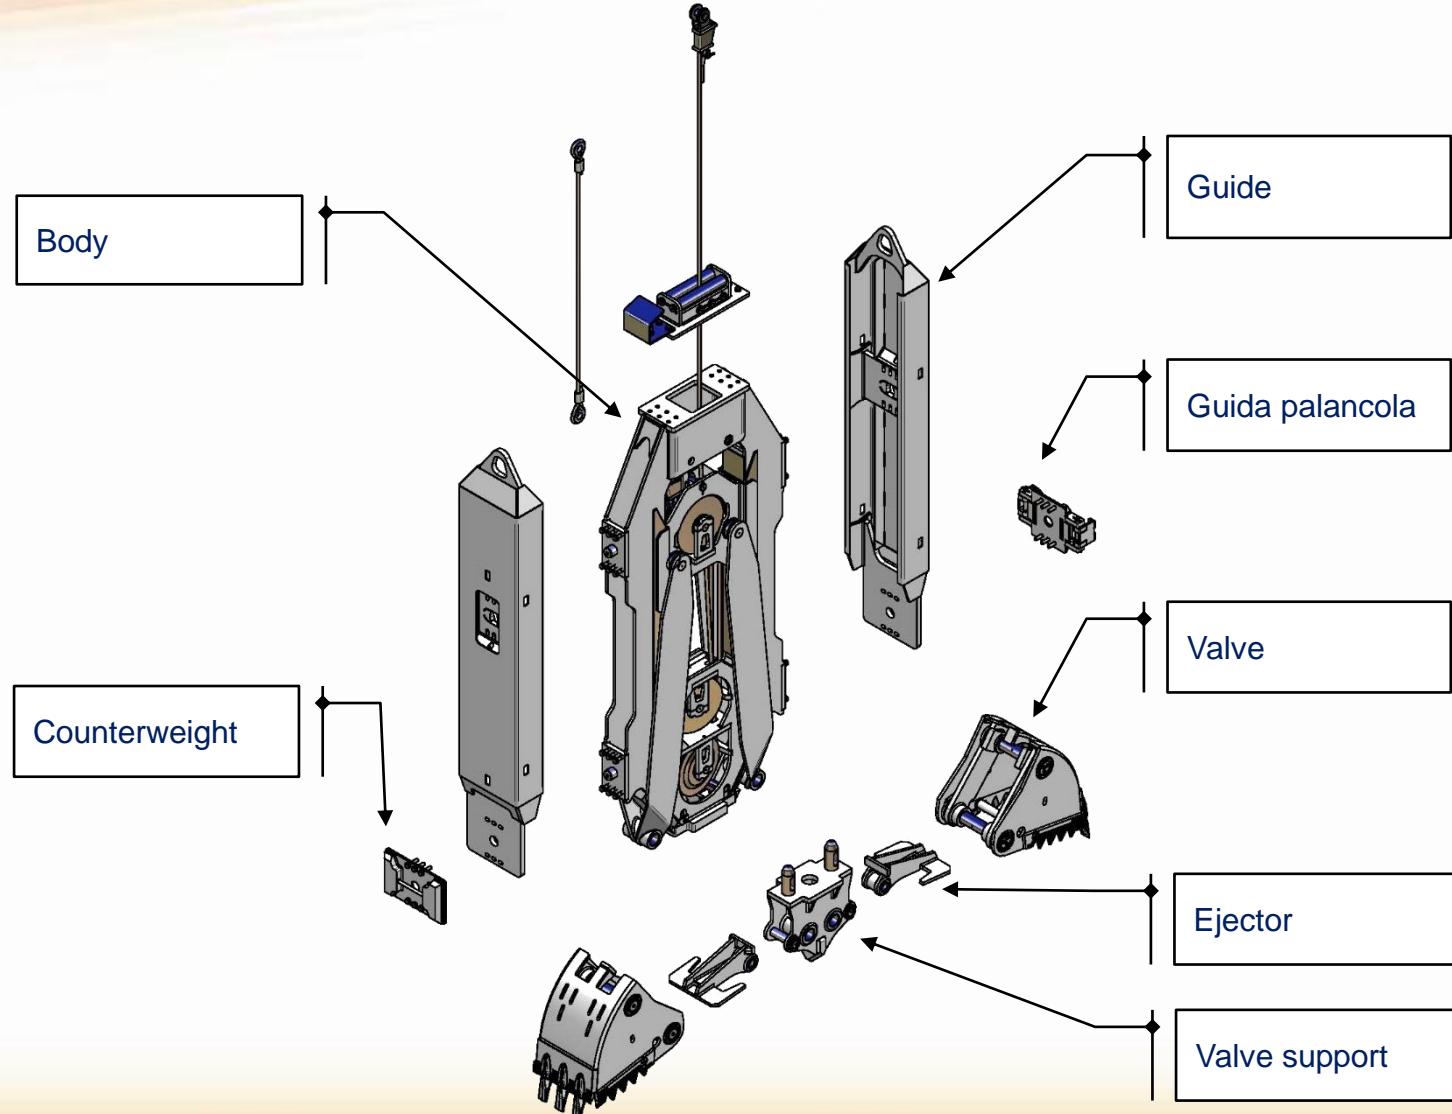

Valve with reduced passages of mud

The bucket is built with a central body and an excavation kit composed of:

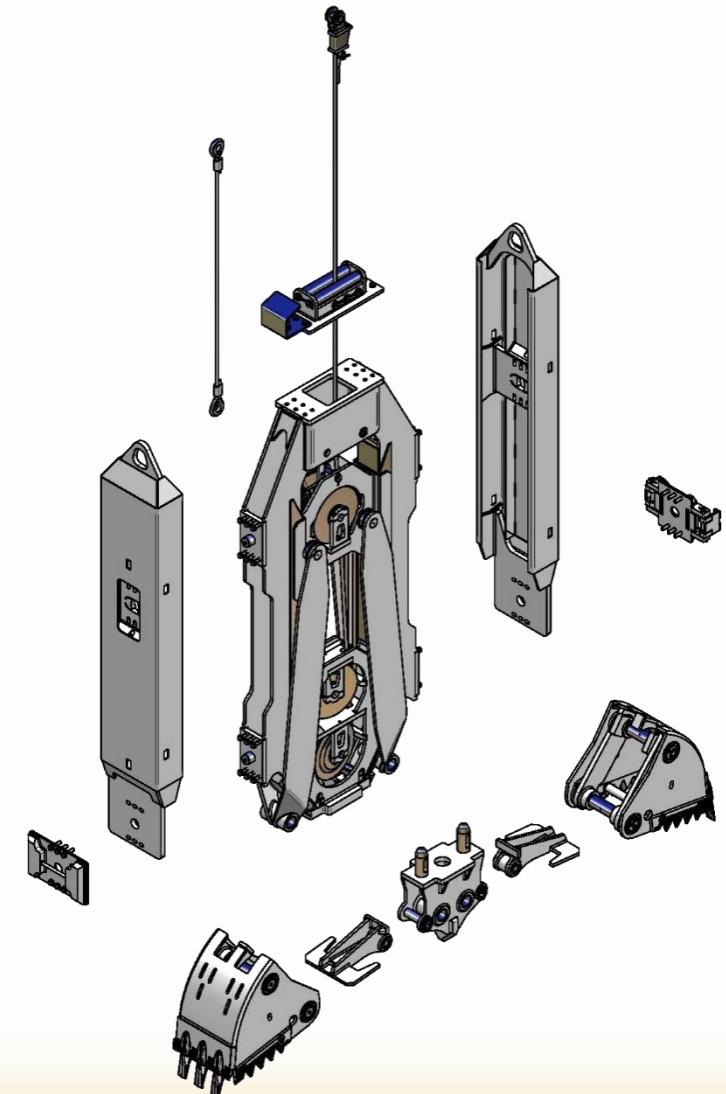

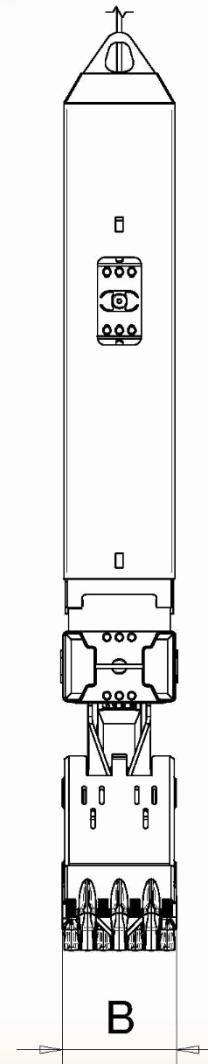

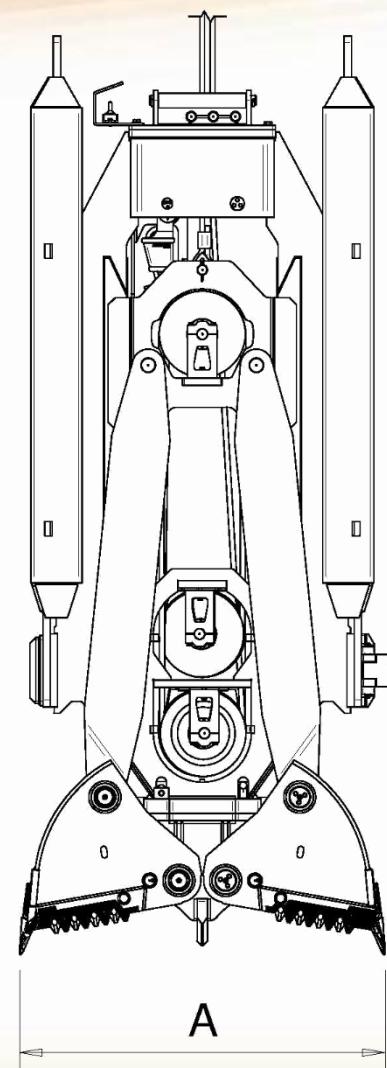

- Valve
- Ejector
- Valve support
- Guide

The bucket is modular and can be implemented with different optional to increase performance

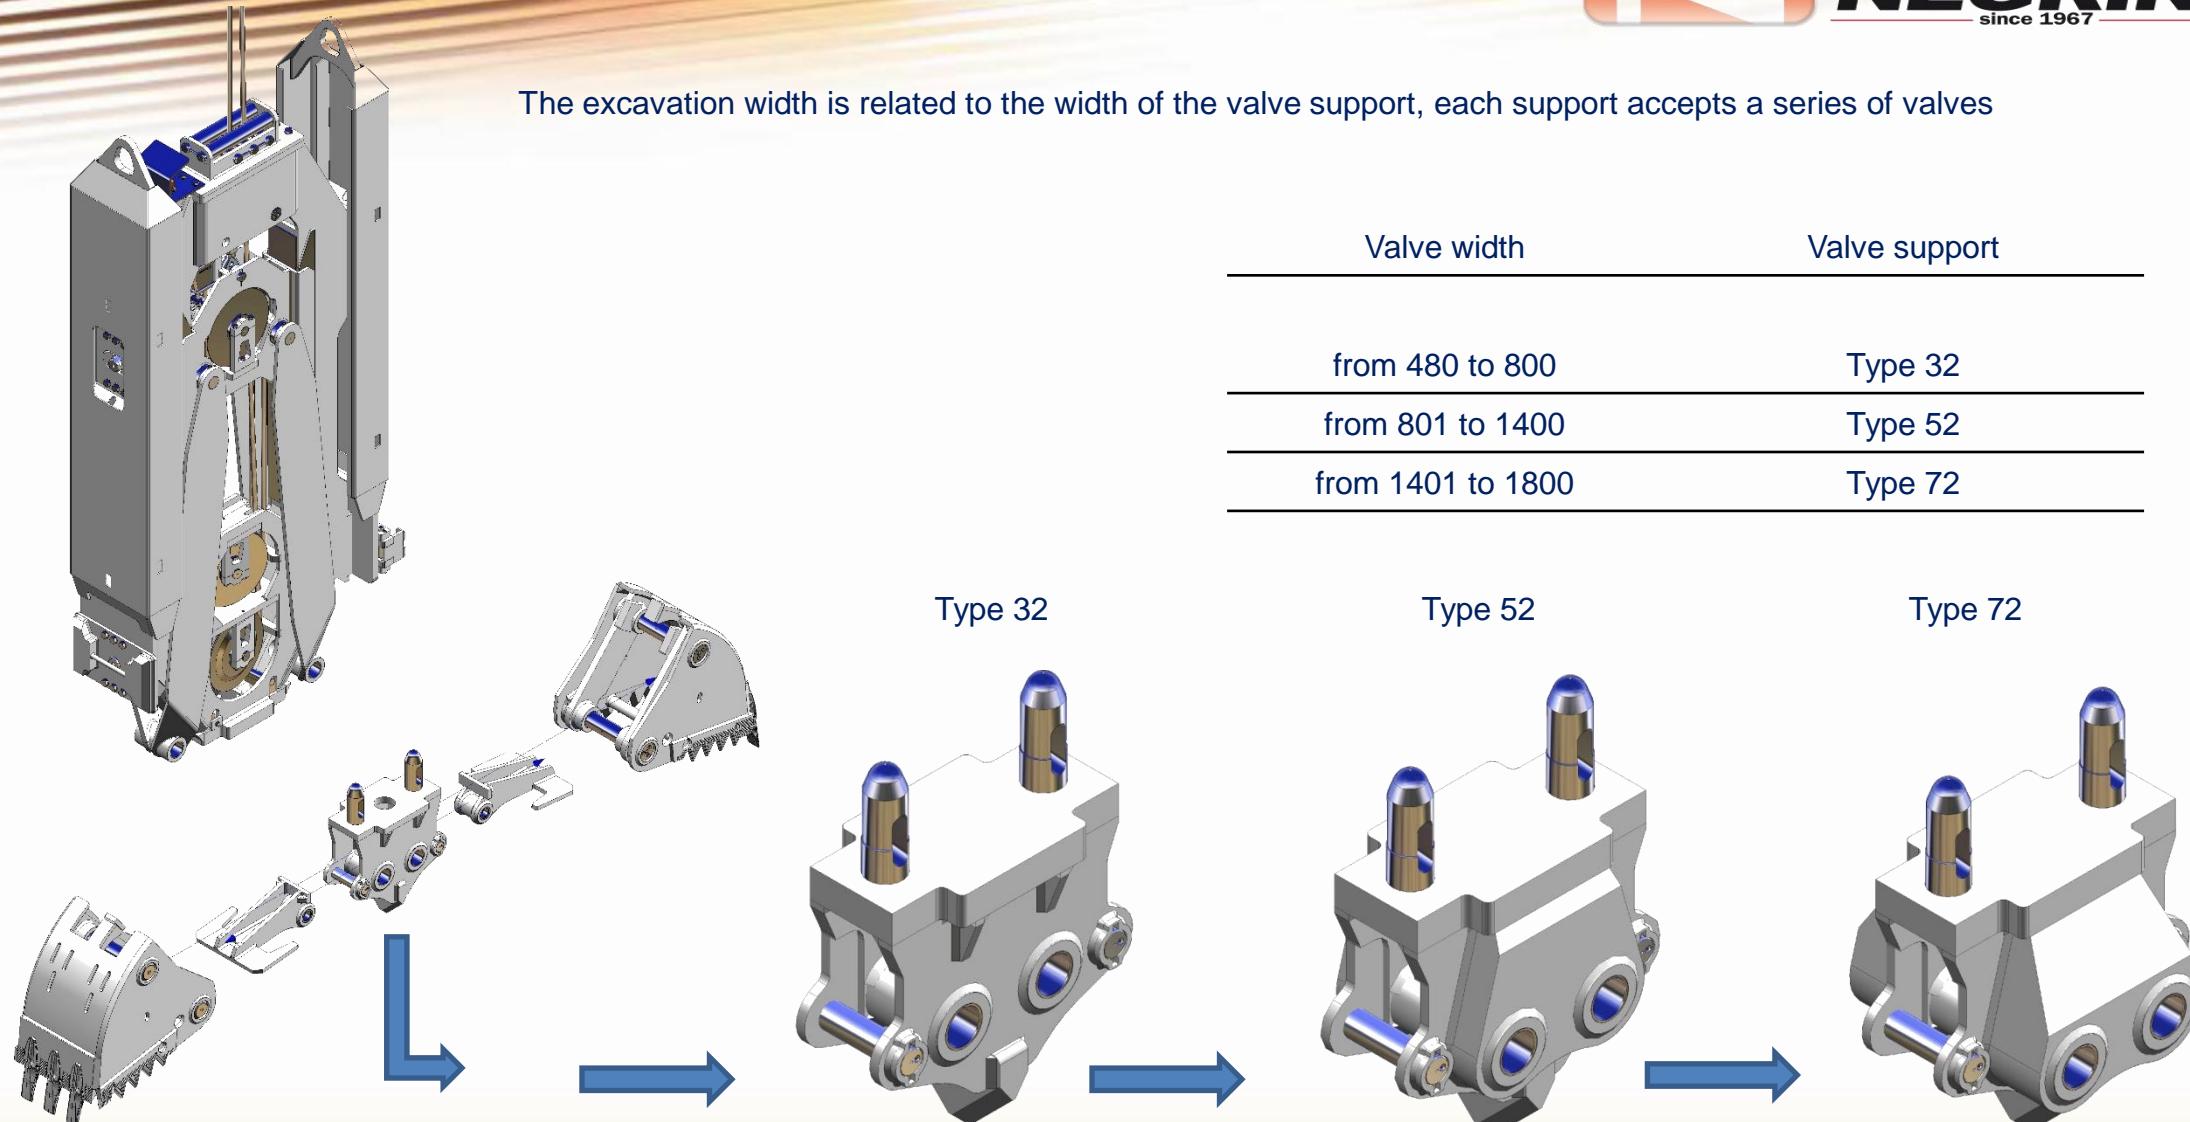

The type of grab are:  
 GP (general purpose)  
 HD (heavy duty)

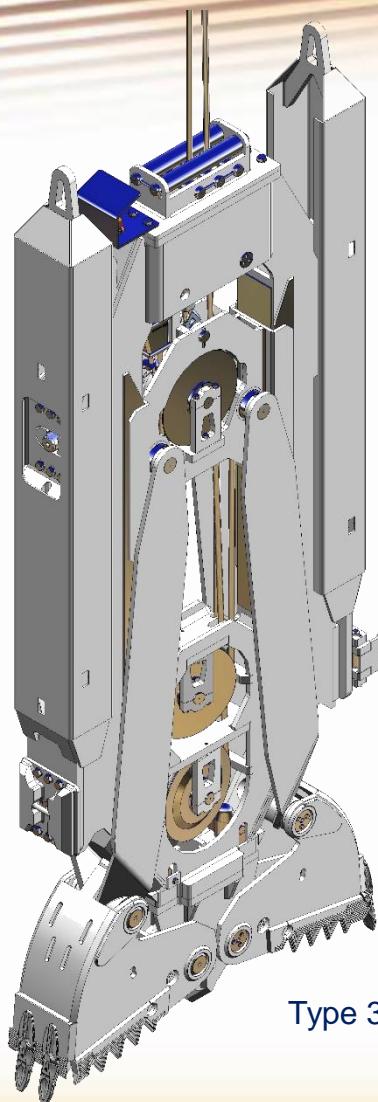

Excavation dimensions:  
Length (A) from 2500 to 3600  
Width (B) from 500 to 1800

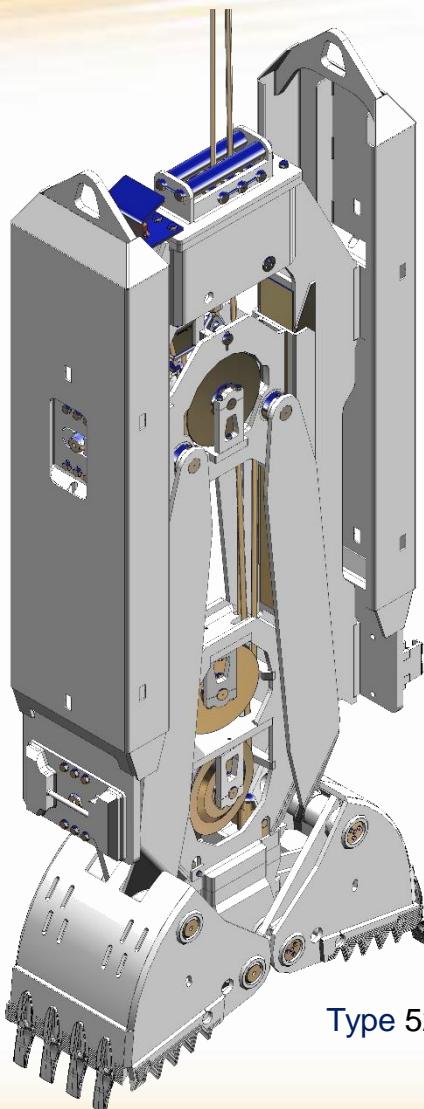

The excavation width is related to the width of the valve support, each support accepts a series of valves

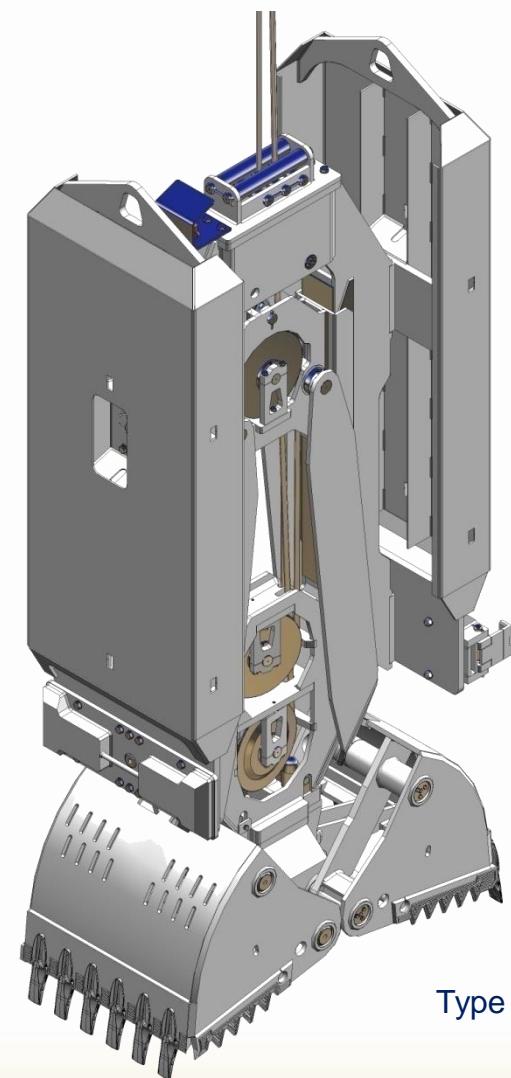

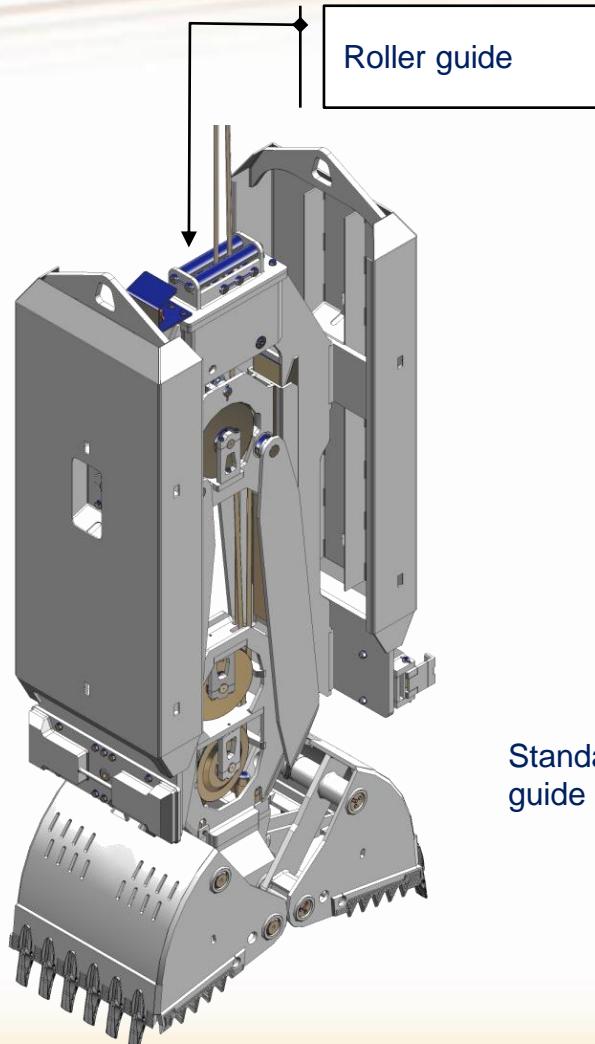

Type 32

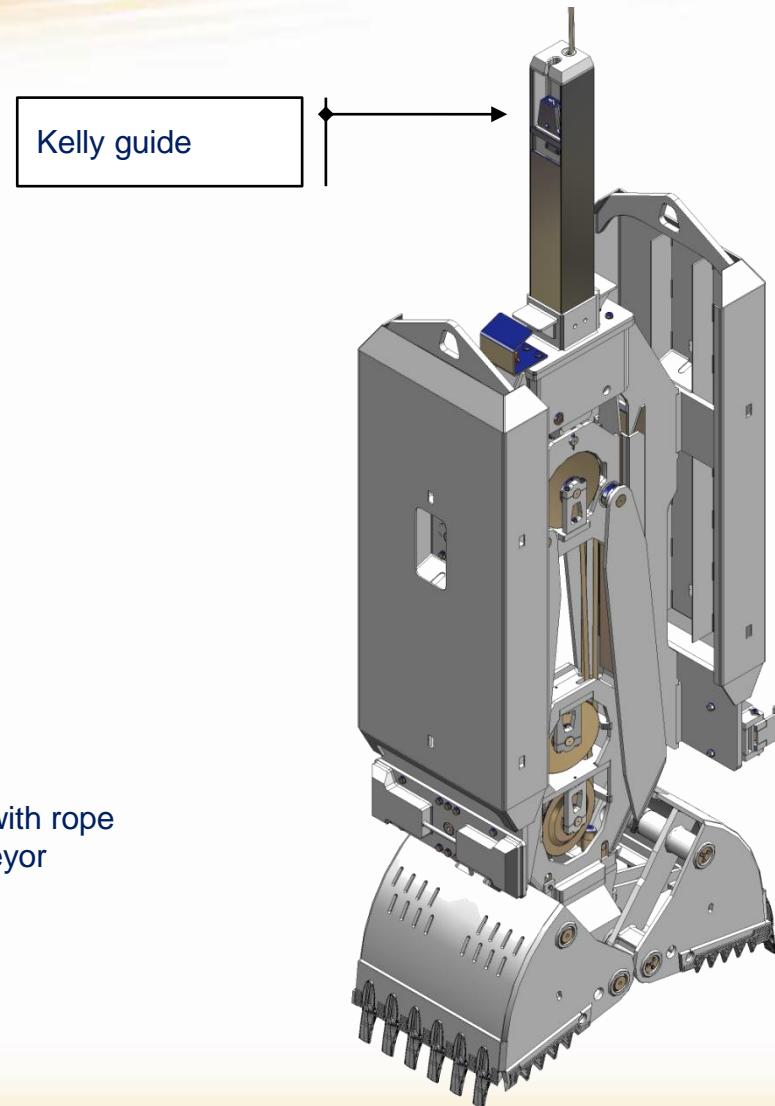

Type 52

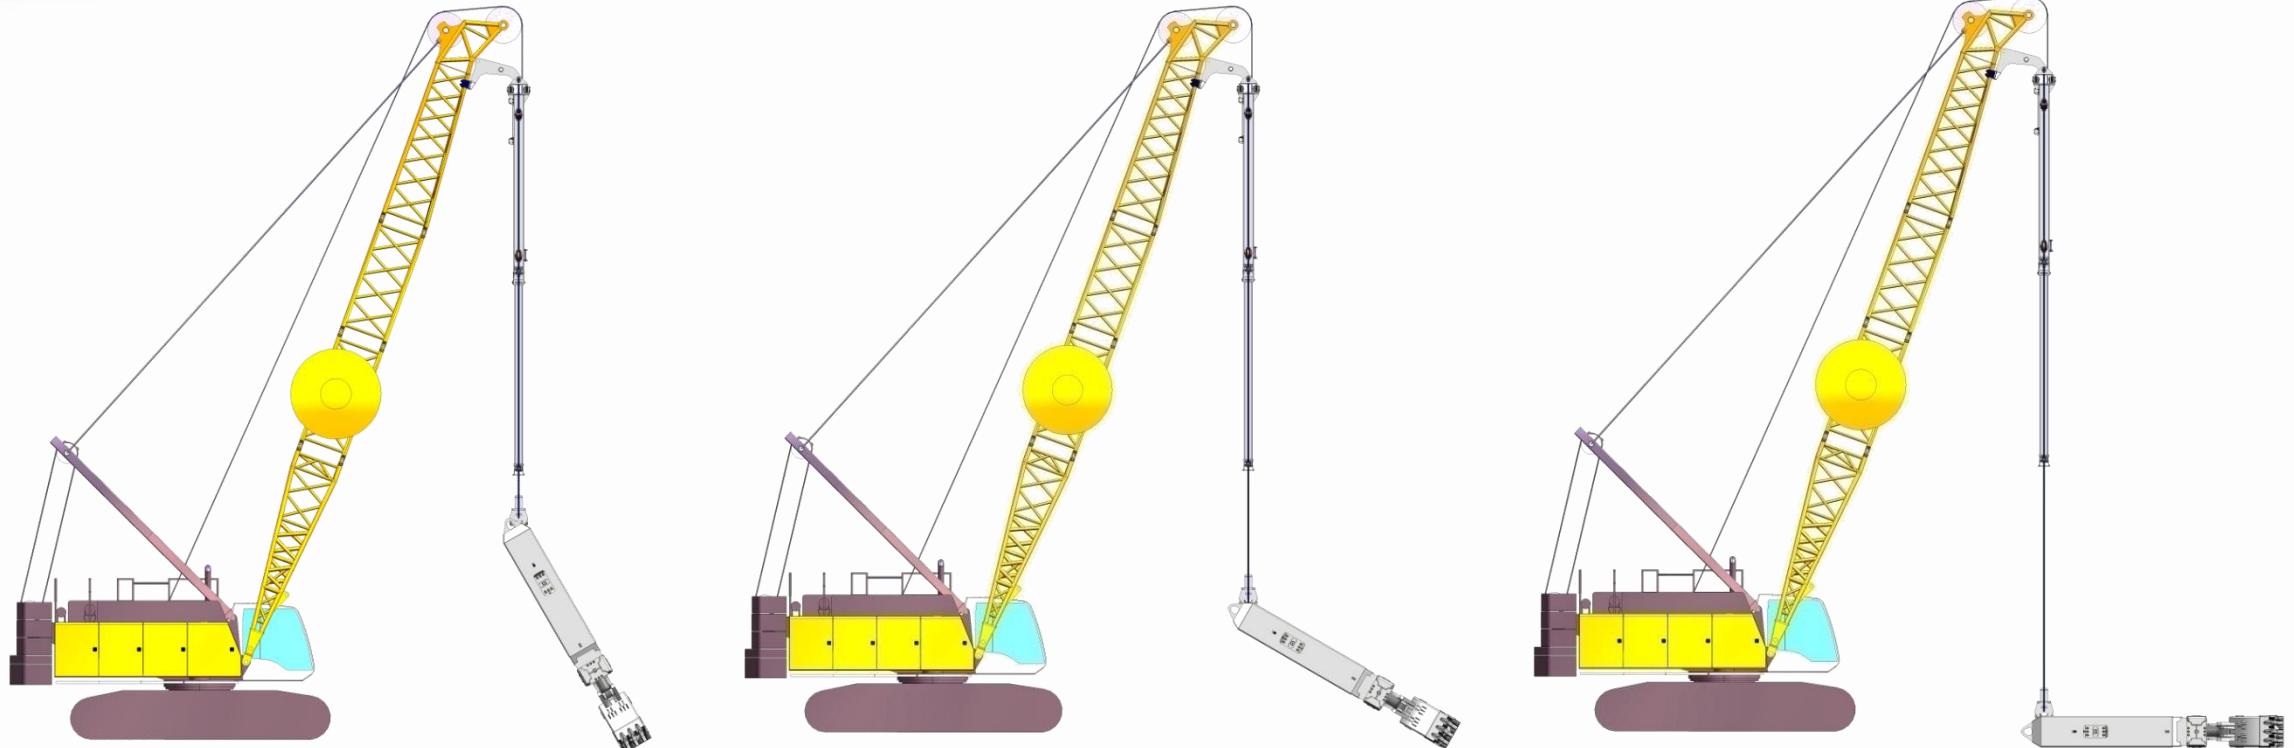

Type 72

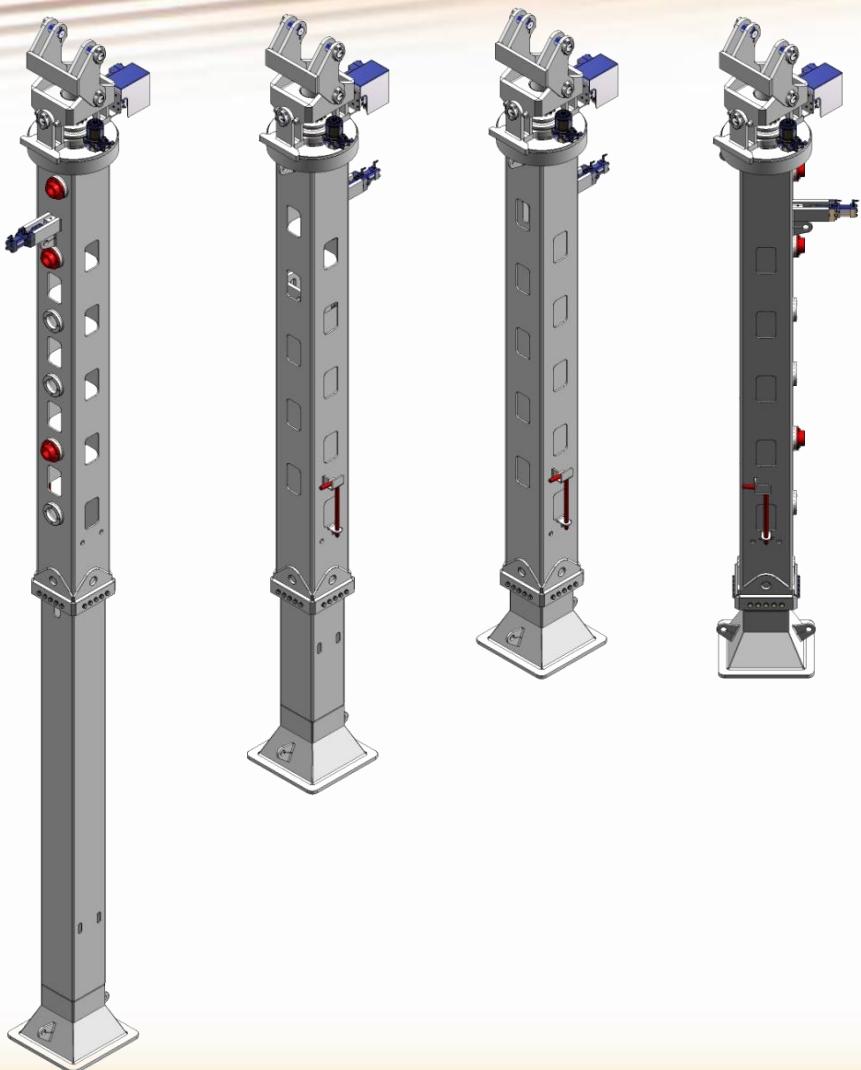

Standard model with rope  
guide roller conveyor

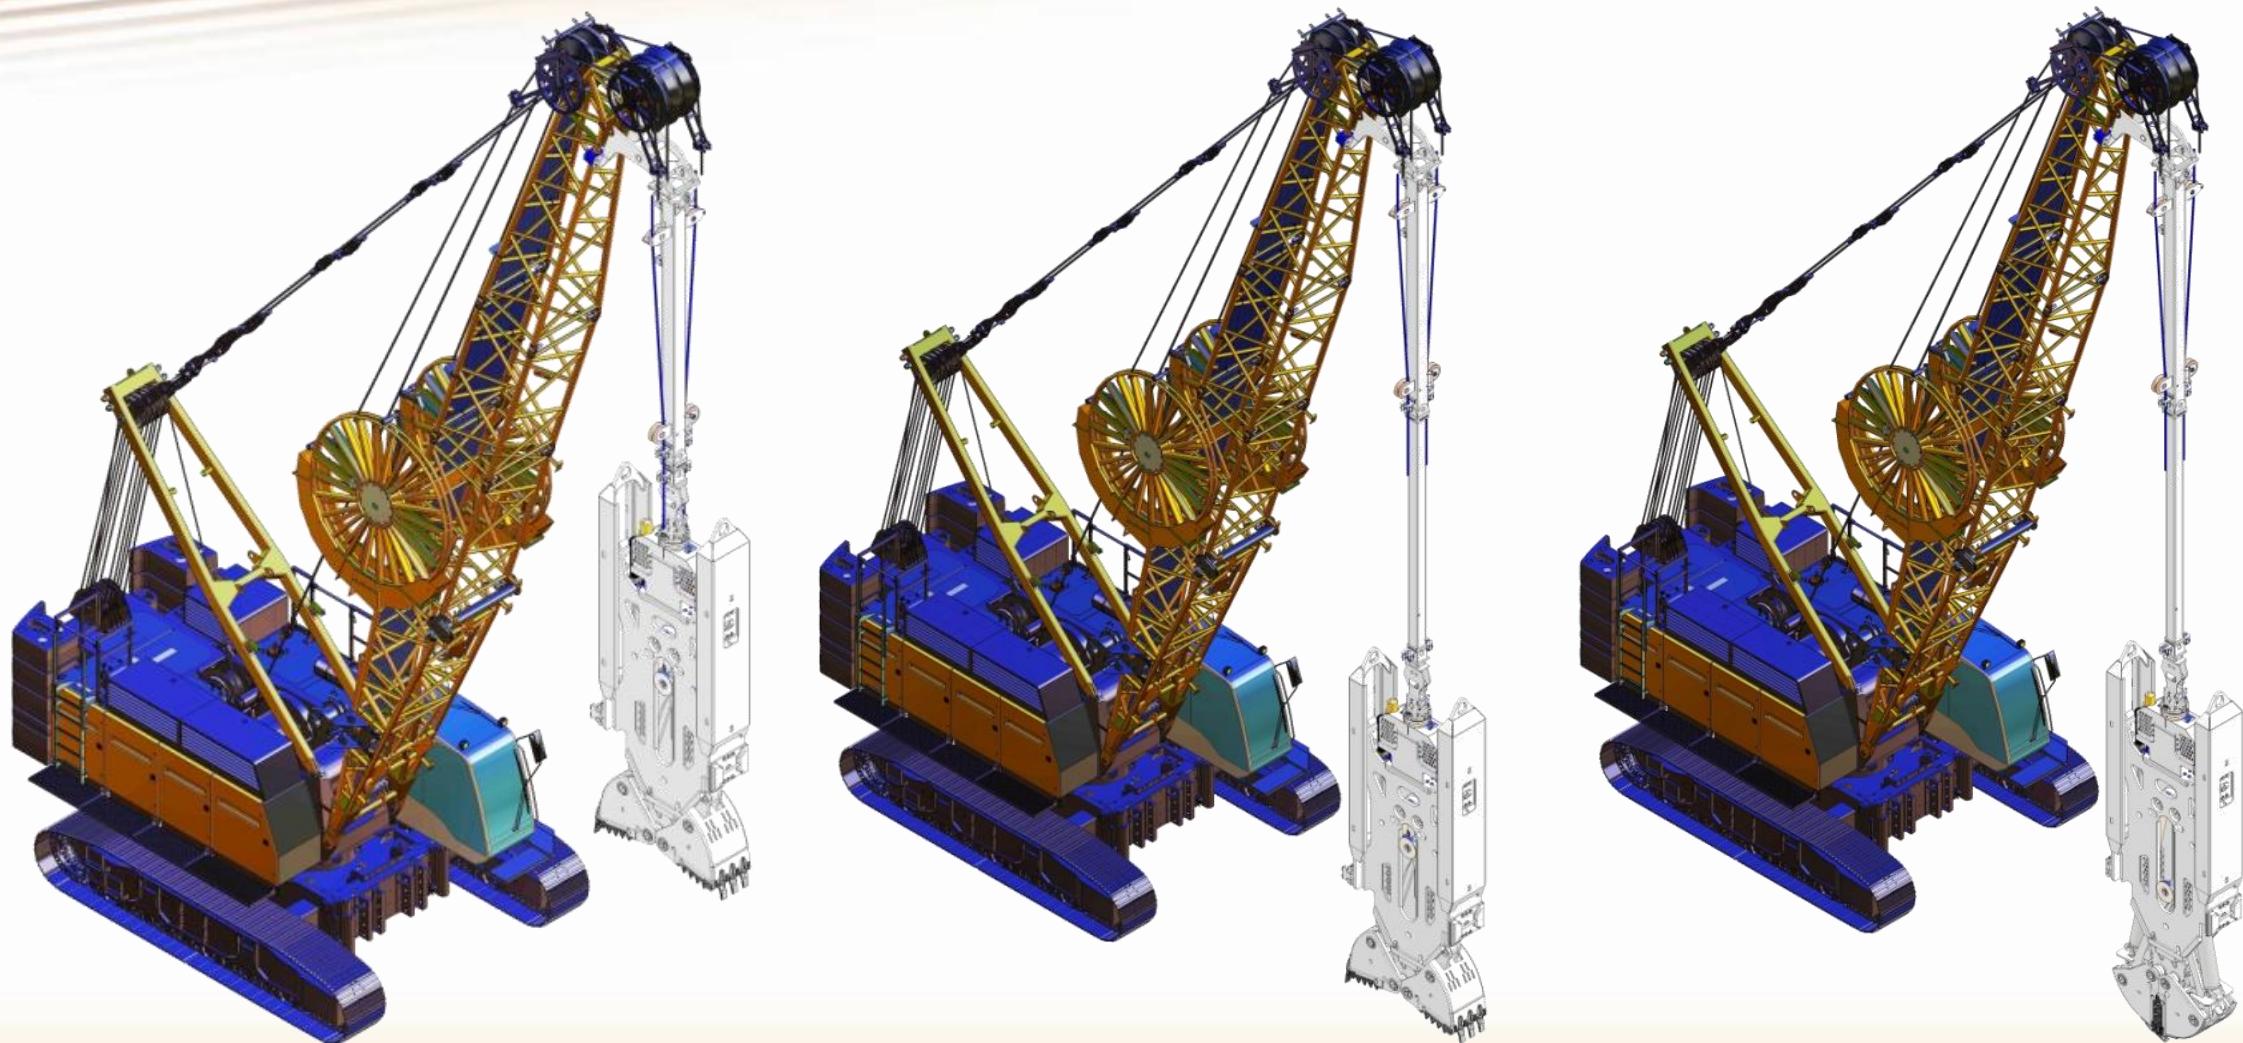

Model with Kelly rod, raises the attachment of the bucket and lowering the center of gravity, so the bucket is easier to use.

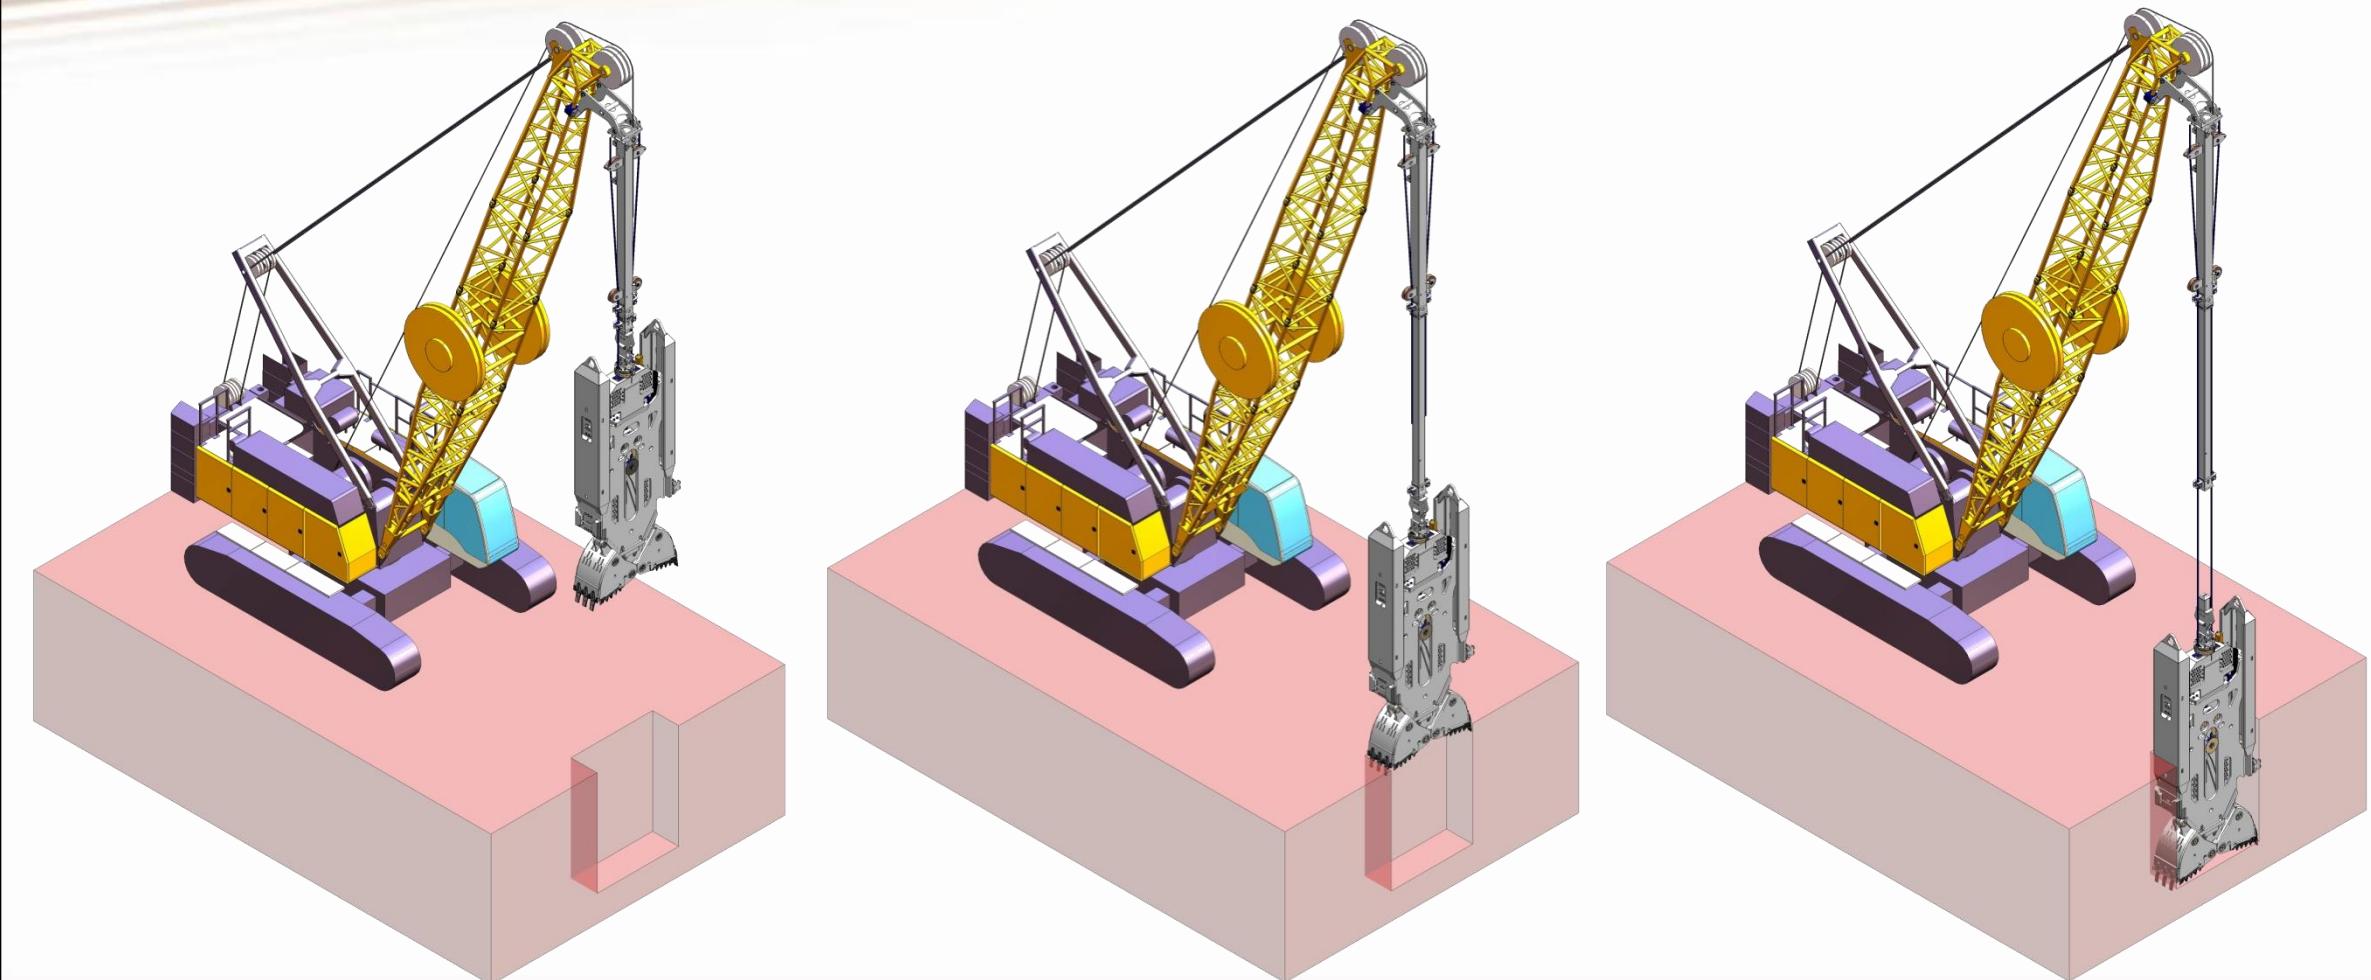

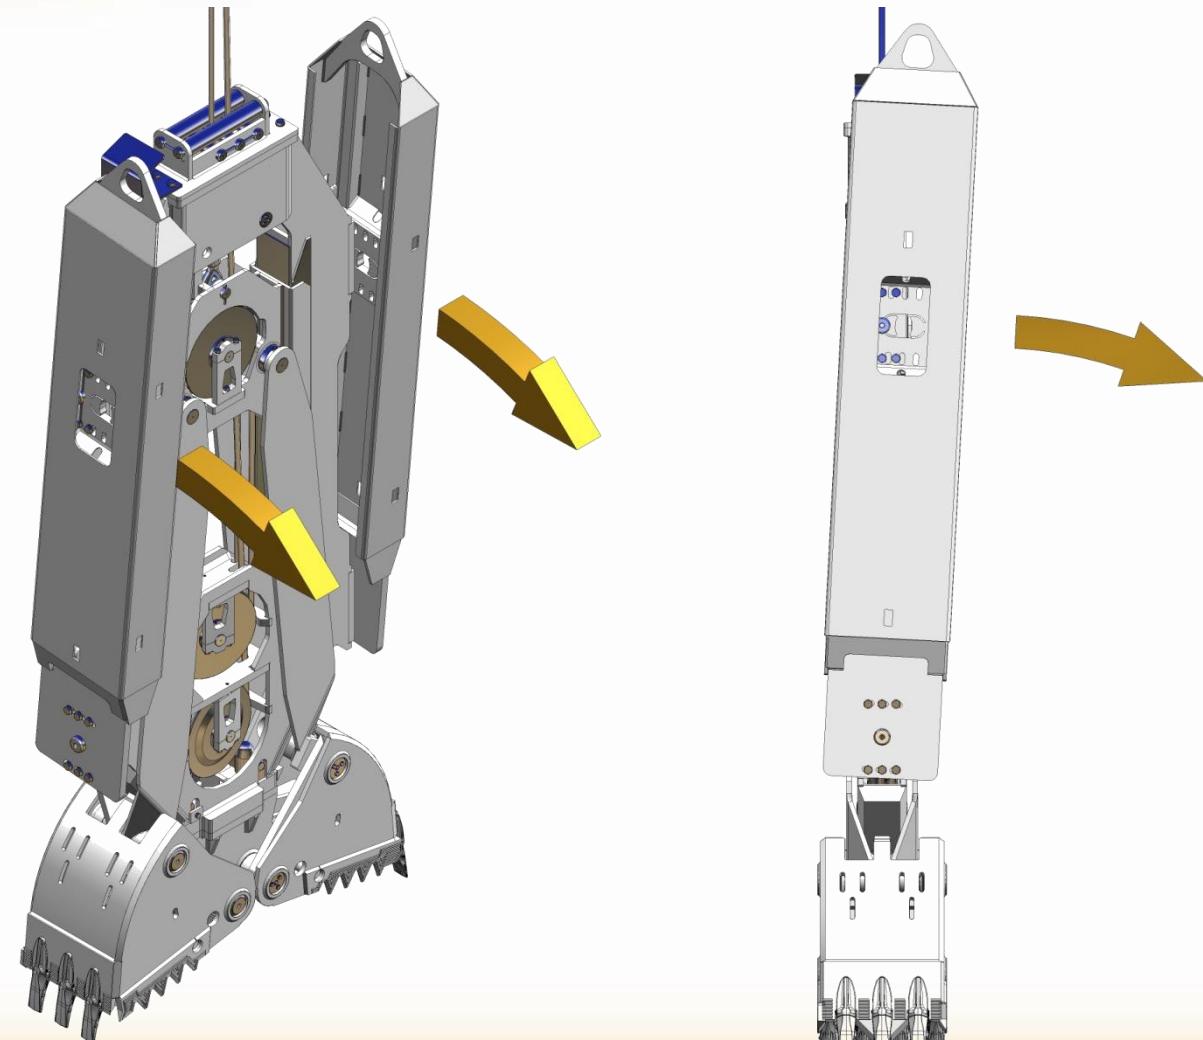

The Semi Kelly permits an initial alignment rotation for digging with subsequent automatic rotation by 180°. The bucket control eliminates the need for a man on the ground and permits digging close to the tracks. The telescopic effect enables considerable bucket raising with the possibility of unloading materials directly into a truck, reducing worksite costs and keeping the site cleaner.

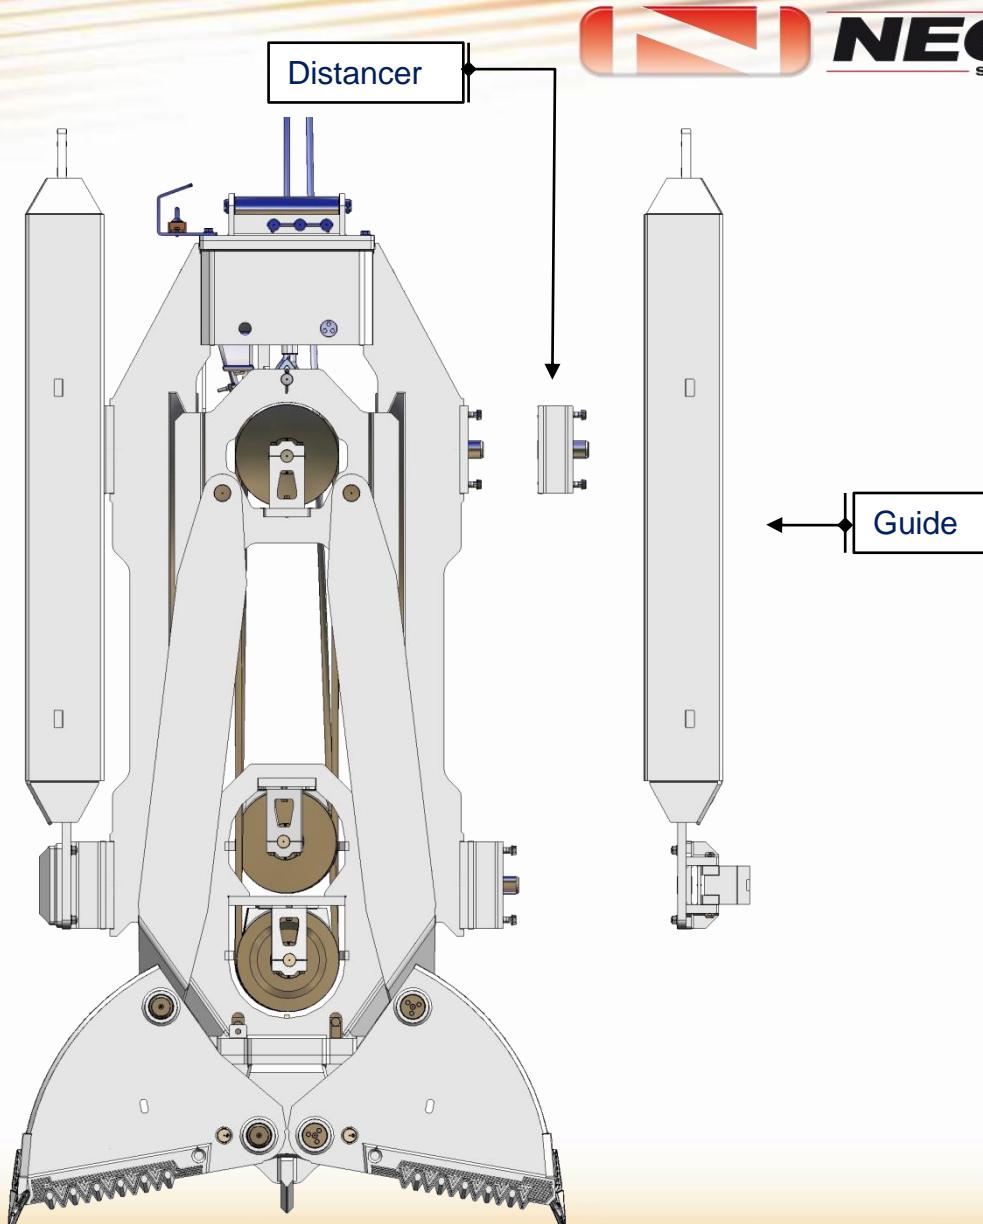

- The oscillating guides permit adjustments to correct the verticality of excavation.
- The system is hydraulically operated from radio remote control.
- The grab must be equipped with the hydraulic rotating head.
- This device permit the installation of the guide from 780 or superior
- This device don't permit the installation of the "guide sheet pile system"

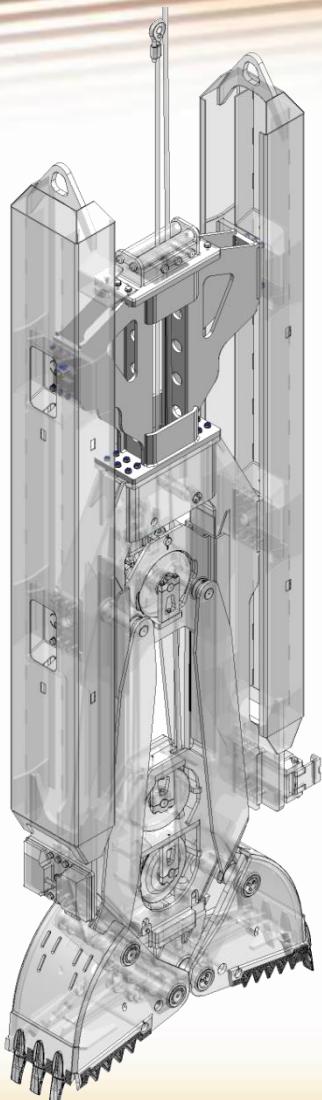

Composition

Jaw opening	Guide	Distancer
2500	2500	no
2800	2800	no
3000	2500	250
3200	2800	200
3400	2800	300

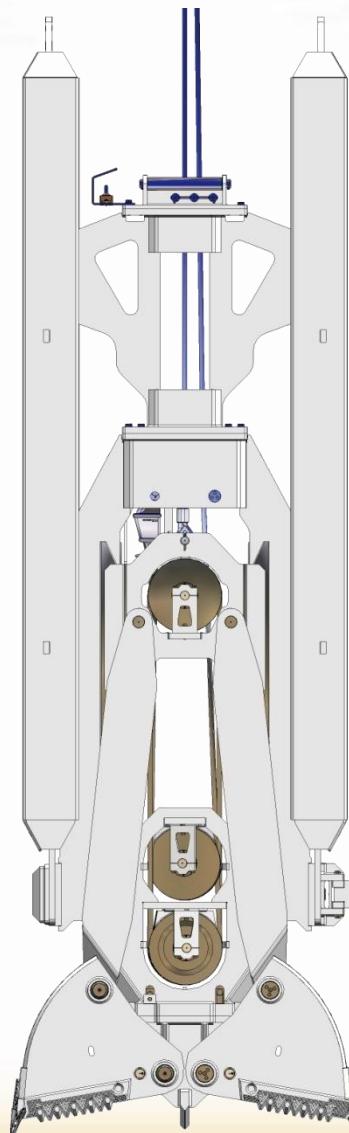

Is possible supply distancer and guides with personalized dimension

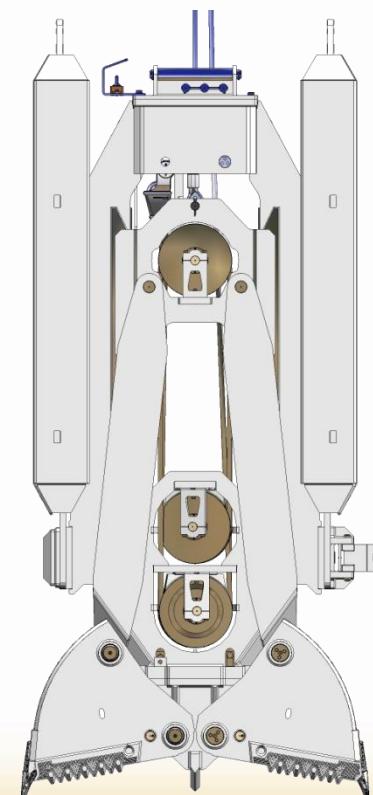

Extension

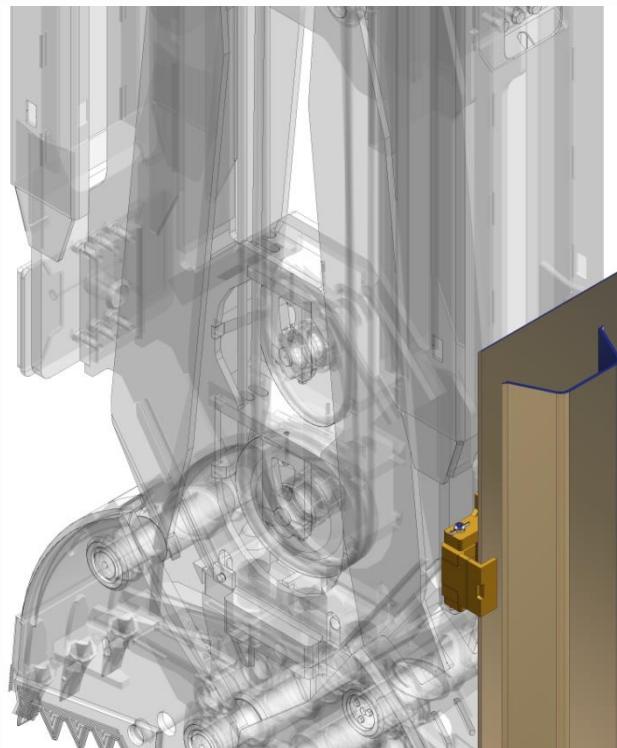

The extension allows the raising of the bucket. The bucket extended increase the vertical depth of the excavation, the extension is recommended over 40 m

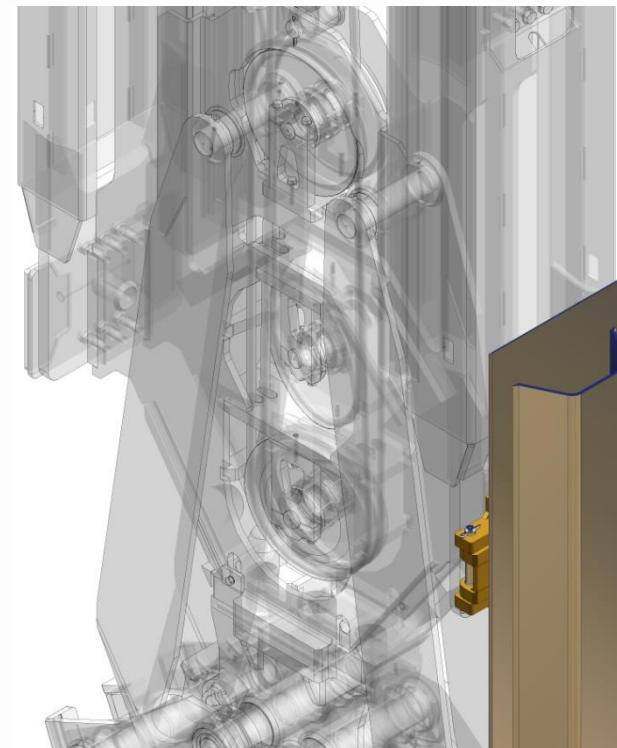

Standard

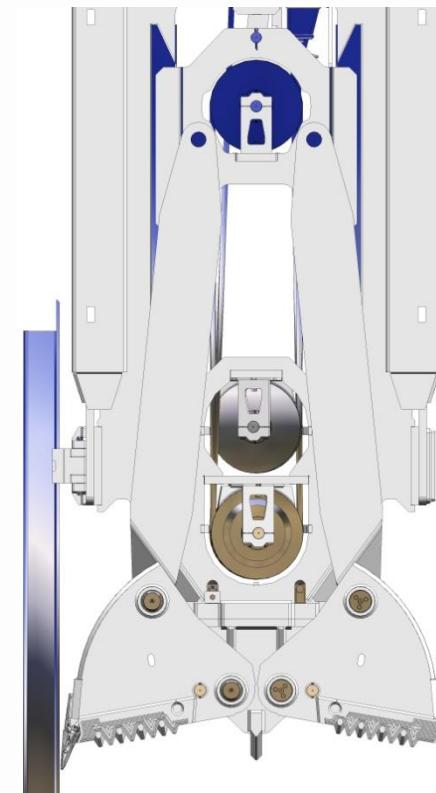

The pile driving hand allows a verticality controlled descent and reduces the adherence of the pile from the diaphragm

Resting hand

Takes hand

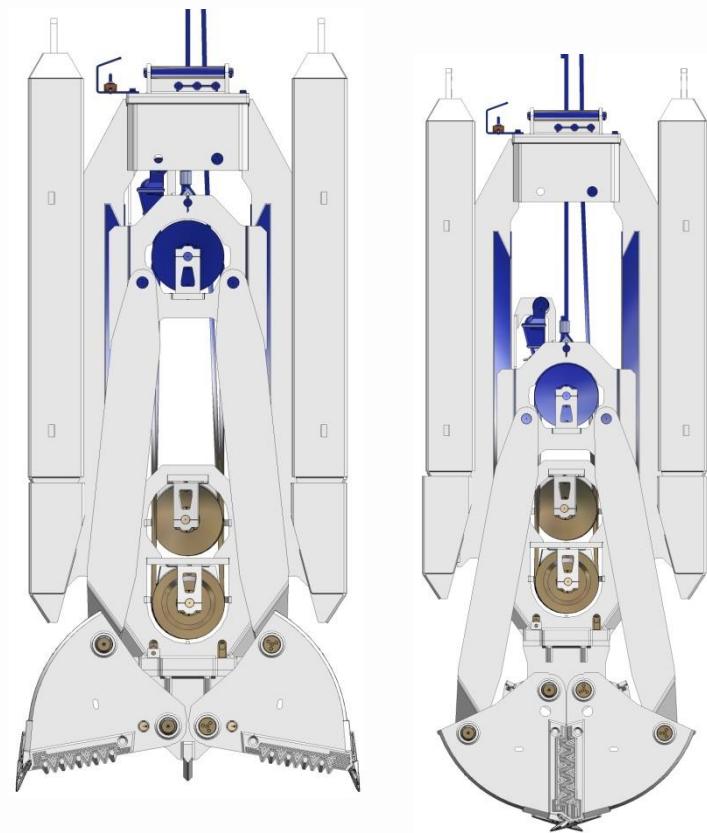

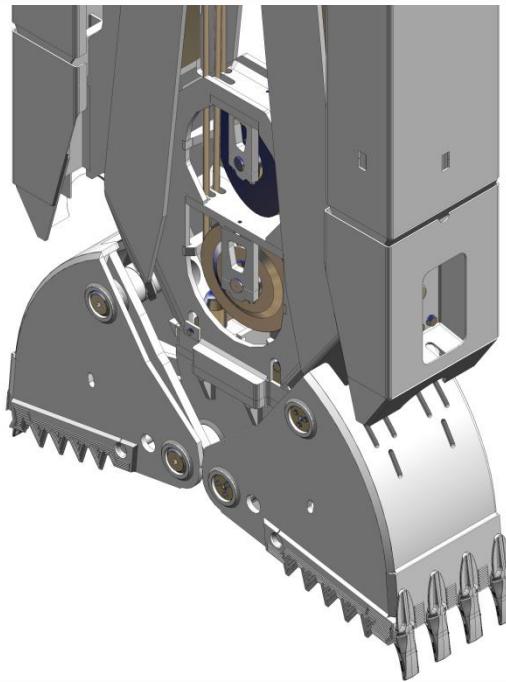

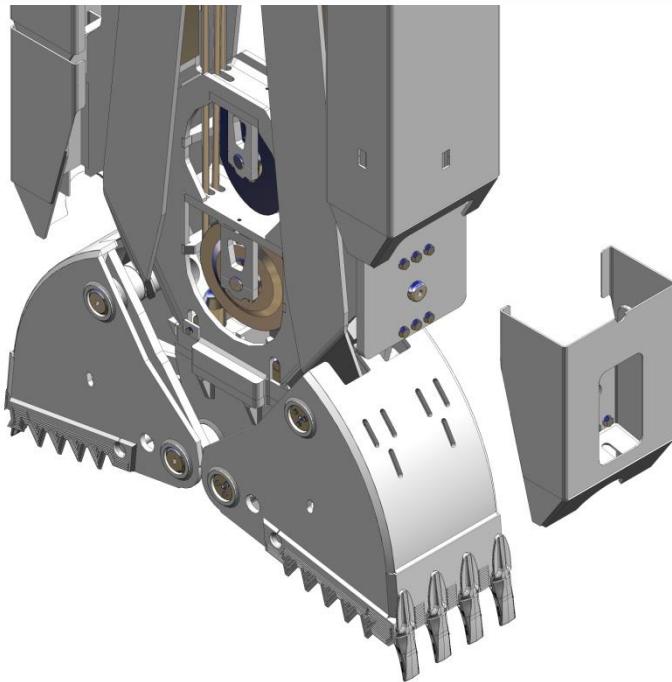

Resting hand

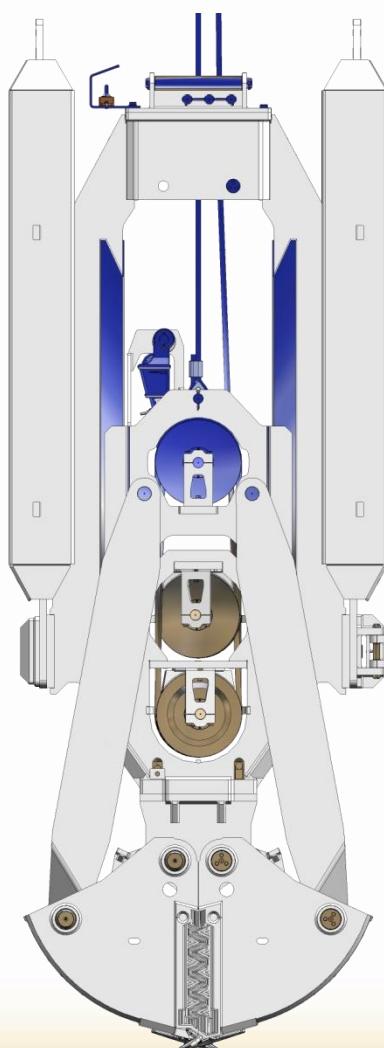

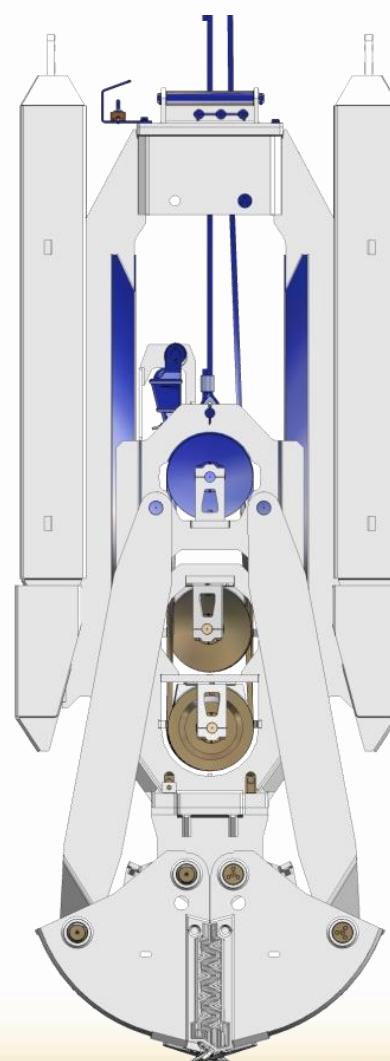

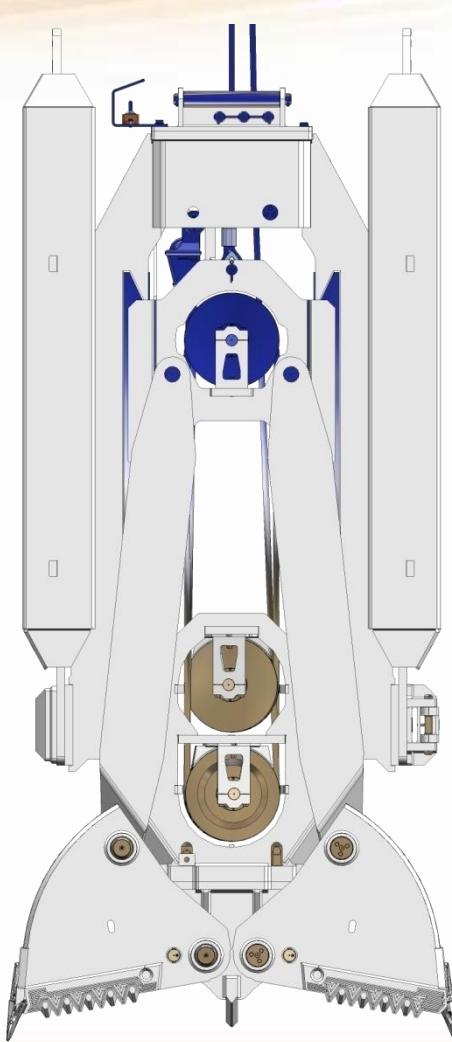

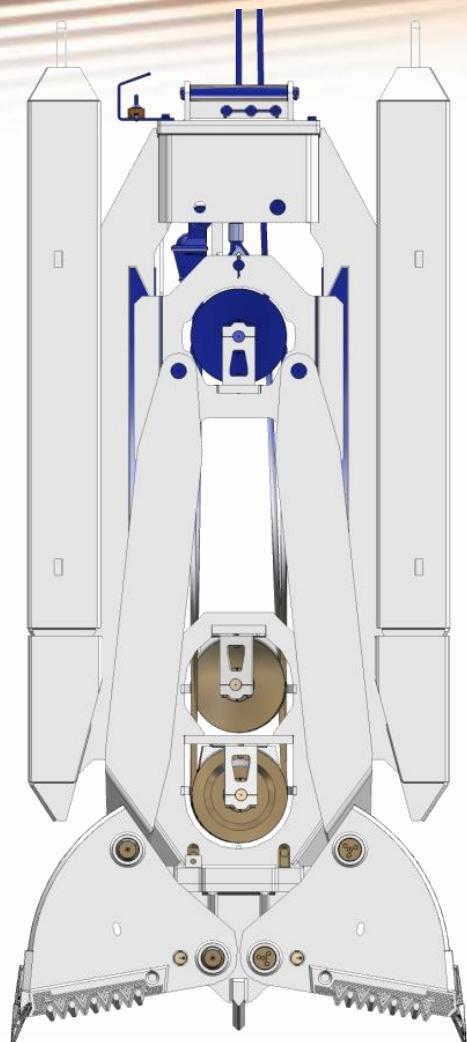

Takes hand

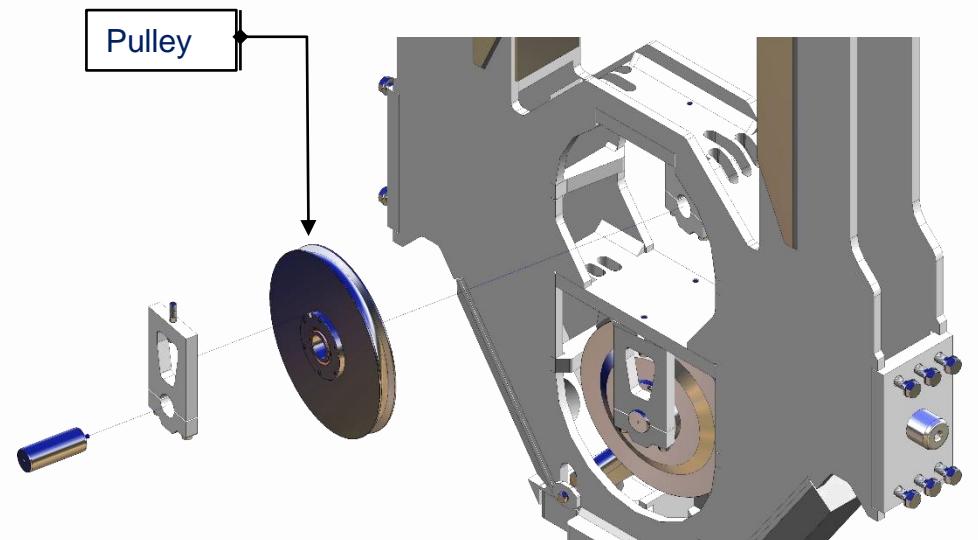

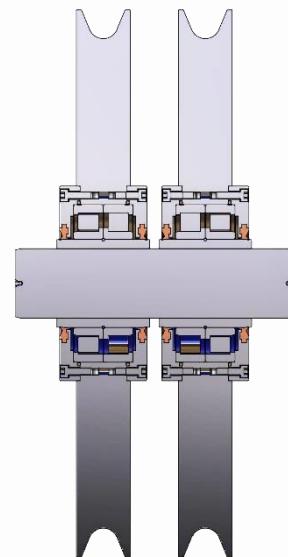

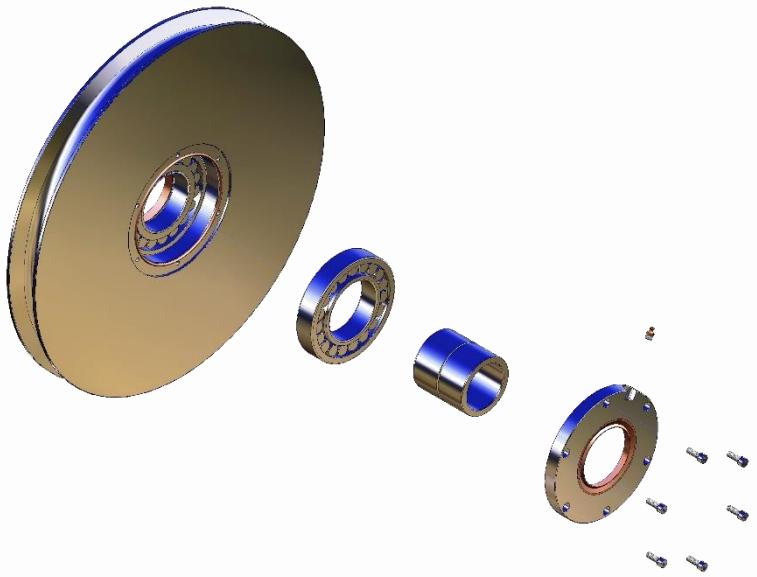

The lower extension allow the bucket to be guided in advance in the diaphragm wall

The extension is fixed on the original guide

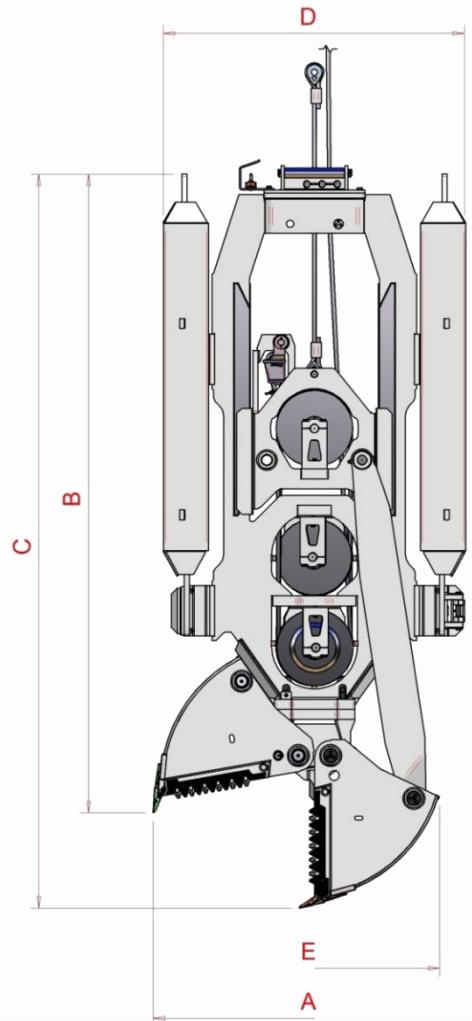

The pulleys with bearings covered by grease and special seals are independent from pin, easy to maintain, it resist in large depths immersed in mud and it can be replaced easily

## ESCLUSIONI:

Sono esclusi dalla garanzia i guasti dovuti a:

- 1 utilizzi non previsti dal fabbricante;
- 2 non osservanza di quanto indicato nel presente manuale;
- 3 collegamento ad impianti tecnici non conformi con la normativa tecnica e legislativa vigente;
- 4 scarsa preparazione tecnica del personale (trascuratezza, negligenza, falsa manovra);
- 5 utilizzo di ricambi, lubrificanti o altri prodotti non consigliati dal Costruttore o non specificatamente menzionati nel presente manuale;
- 6 parti soggette ad usura
- 7 normale usura e deterioramento dovuti all'uso della macchina.

Sarà cura della **NEGRINI s.r.l.** accertare le buone ragioni del Cliente e sostituire le parti riconosciute difettose.

## EXCLUSIONS:

Faults due to the following are excluded from the guarantee:

- 1 uses not foreseen by the manufacturer;
- 2 failure to respect what is indicated in this manual;
- 3 connection to technical systems not in compliance with technical regulations and legislations in force;
- 4 poor technical training of personnel (carelessness, negligence, false movement);
- 5 use of spare parts, lubricants or other products not recommended by the Manufacturer or not specifically mentioned in this manual;
- 6 parts subject to wear and tear;
- 7 normal wear and deterioration due to the use of the machine.

**NEGRINI s.r.l.** shall assess the information provided by the Customer and shall replace the parts it recognises as faulty.
